

2 groups

Get a partition length  
- If specified then standard, will return  
"ATTRIBUTES"  
If not specified of "IS LED TRUE"  
If not specified of "IS LED TRUE"  
If not specified of "IS LED TRUE"  
If not specified of "IS LED TRUE"

As partition is created, it's compared to  
standard array (is len those). If true,  
partition len is output, otherwise  
not output. Should keep partitions in  
sync for multiple standards.
